Foreword

On the pages that follow we have endeavored to bind a brief summary of our training and life for three years — a period that has embraced many friendships, hopes and dreams, duties and learning. As you unfold each page, you unveil our life for three years, every page chronologically representing many days in our training. Above all, the real significance of this book is to bring to our memory the many little episodes of joy, tribulation, and, far greater than any materialism, the many experiences of self satisfaction that only our individual hearts can appreciate. May it be that we, in leafing through this record, can quickly recall in a glance those things which are stored in our memory of three years at Hahnemann.

This is our story:

Miss Martha A. Cunningham, R.N., B.S.
Director of Nursing

Miss Cunningham, since she joined us in September,
has become one of our best friends, while filling the post
vacated by Miss Grant —

Miss Esther R. Grant, R.N., B.S.

Nursing—

A glamorous profession

Just relax — we were so eager — Hypo — (here it comes!)

We were so bewildered and lost — was it really to be as such ???

*What will happen if the water doesn't come out ???
Relax, now. Someone get the pan and the paper
ready! Take a deep breath, honey.*

*OUR big and little sister party. We just loved chorus
— oh my, they look so casual —*

*Such class enthusiasm! Gee, I'm so tired of sittin'
Clock watchers we were — we are.*

*Future Power models — such sparkling vitality. The
uniforms did so much for us.*

The joy of
your first assignment

Oh, Oh, those days on medical. Those patient nurses who struggled with us thru those dark times — thank you all, especially Mrs. B.

Doctor, now who gets the insulin??? One of our most beloved treatments??? Hi, to one of our favorite interns.

ome on, Dad, take some more H_2O . Sure hope
ese crib sides stay up.

*Can't talk to you, doc, my teeth aren't in. Don't lose
that Key if you value your life, M. S.!*

Would you mind lying on your back? It would be so much easier to take your B. P. that way.

Oh, Doc, take it easy — So that's where all the constrictors are. I'll bet he doesn't have enough blood; guess I should have shaken it up.

Life gets tedious, don't it???

Take it again, didn't get it the last time.

Can always start a poker game anywhere, can't we fellows??? Laughter can always be heard on Orthopedics. Oh those plaster casts!

Another diabetic! Sure did gain weight in our kitchen.

JUNIORS

Thru the long
AND sleepless night

What time do you want your case scheduled??? I must look up his technique. Sorry, filled up for the next month.

Honey, have you had the heat lamp today??? Our new B. P. machine.

Get your foot out of the pretzel can. This is really self service. Our famed Senior Store.

Sterile technique — .Don't turn your back to the table. Just a minute please, sir, here is one place in which six arms would come in handy.

Our famed telescopic basketball misses.

Who CARES!

CLASS ADVISER
Ruth A. Appler

The much needed plodding, the encouragement that was given to us, will always be remembered . . . those Friday night dances, spaghetti dinners and the **extra** privileges spoken on our behalf.

For her increasing efforts for us and for her willingness to help us, we, the Class of 1950, say a sincere "Thank you" to Miss Appler.

Ah yes, we have arrived at Hahnemann. Such a thrilling day. The latest style — red stockings and shoes. Mommy, don't leave me —

This is our accident ward — and a most cooperative admission. The orderly was so — helpful —

No, No, not that high compound enema for — guess who! This is the exact way to approach a patient who is to receive one — take a deep breath, dear.

Do-Re-Mi, that's it girls. Breathe from your stomach. Don't squirm girls—now let's try that again.

The parade to the J—in the early dawn led by pure instinct alone. Can't see a thing so early in the morn'. Hurry up, I'm next.

Refreshments, oh boy. Now girls control yourselves. Don't stam pede the table. We are going to get a patent on that punch.

Excuse us, but we're so tired. Must get to bed early one of these nights. Grief, such loud p. j.'s — they would wake anyone up.

Only time you could keep us quiet — when we're eating. Our mouths are too full to talk. Sure did taste good.

Our Alma Mater — How we envied those in white, but our day will come soon.

*Gosh, is that how you hold them? They are so small.
Don't they ever keep quiet — sure got a lot of T. L. C.*

*Pediatrics here we come. Never turn your backs,
girls. First time we ever saw a baby lie so still.*

What happened here?

How can you smile and hold that long needle at the same time?

Our wonderful Christmas dance.

Boy, what did Santa have for us!

Top view—clever.

Chow line???

Swing your partners.

Roll that spaghetti. So good, mmm—. All you want plus the atmosphere.

Dancing cheek to cheek.

Music maestro, please.

Our Autumn Ball at the Bellevue-Stratford.

Remember the night.

Dr. Price

ODE TO THE CLASS OF 1950

If you can please the supervisors and the doctors,
The Medical Director and the patients too,
The patients' families and your senior nurses,
'Twould seem that you'd have quite enough to do.
If you can please the Czarines in the pantry,
The Napoleons who massage and bathe the hall,
And yell at you for not walking on the ceiling;
Or smile when you have lost your beau's phone call.
If you can please the interns and the residents,
And hold your tongue when the buck they try to pass,
Or when maids and elevator workers
Think your day is lost without their sass.
If you can stay your tears when in the supply room
They ask for whom and why you want their wares,
Send you back pronto for requisitions
And make you climb what seem a million stairs.
If you survive two months in the O. R. suite,
With "Tie my gown" and "Hand me this and that"
The wild excitement of the surgeon's scolding,
Still don't give up and leave your training flat.
If you don't swear the night you've got a "heavy,"
And are informed it's your turn to relieve,
If you still stick when lying tongues run rampant
That those in charge seem disposed to believe.
If you can keep your head when bells around you
Are ringing 'til you don't know what to do,
If you can keep your heart when handsome interns
Are losing theirs and blaming it on you.
If, when you have finished training,
You can look back upon that life as mild,
Yours is the earth, but I'm here to tell you
You'll not be a nurse --- you'll be a saint, my child!

A Nurses Psalm

These are my patients,
They shall not want,
I maketh them to lie down in warm blankets.
I feedeth them with a glass tube,
I restoreth their health,
I teacheth them the way of our hospital
For my sake.
Yea, though they sleep in plasters and splints,
They shall feel no pain.
My smile and my hope they comforteth them.
I prepare my hypos in the presence of the supervisor.
I anoint their bed-sores with oil,
Their kidney basins run over.
Surely bed-pans and groaning,
Will follow me all the days of my life,
And I shall dwell in a uniform forever.

" Alas--- parting
is such sweet
sorrow "

The Doctor

Letter

A Portrayal of a Famous Victorian Doctor and a Peasant Child

It was during the reign of Queen Victoria that a simple forester's cottage near Balmoral Castle, North Scotland, became the setting for a human drama that will live forever in this painting, "The Doctor." • A favorite servant of the Queen lived in this cottage with her husband and their only child. Upon hearing that the child was seriously ill, the Queen wired to London for her personal physician, Sir James Clark. Sir James came by special train and remained in constant attendance upon the child until the crisis was past. The child recovered. • In 1891, Queen Victoria commanded Sir Luke Fildes to immortalize the scene on canvas in commemoration of the faithful devotion of the physician. • The "Sculpticolor" rendition is dedicated by Wyeth to the friend of all mankind, The Family Doctor.

*Modern
Medical
Science*

The pictured child recovered despite the inadequacies of her humble home—a tribute to her doctor's genius and to the progress of medical science. Important advances have since been made in the struggle to conquer human ills; greater developments are yet to come. The physician of today has at his command more extensive scientific knowledge, greater clinical skill, miraculous new drugs and perfected instruments. He is ably seconded by pharmacists, technicians and nurses whose education and training are much more thorough than in the past. The medical, pharmaceutical and nursing professions have joined forces to provide for the sick and injured of every community, a service unparalleled in history.

*The
Family
Doctor*

The service of the general practitioner is characterized today by the same virtues as those that have ennobled his profession throughout the ages. In the words of the great anatomist and physiologist, renowned poet and writer of prose, Oliver Wendell Holmes, the family doctor "is the flower of our civilization; and when that stage of man is done with, and only remembered to be marvelled at in history, he will be thought to have shared as little as any in the defects of the period, and most notably exhibited the virtues of the race. Generosity he has, such as is possible to those who practice an art, never to those who drive a trade; discretion, tested by a hundred secrets; tact, tried in a thousand embarrassments; and what are more important, Herculean cheerfulness and courage. So it is that he brings air and cheer into the sickroom, and often enough, though not so often as he wishes, brings healing."
